

AI WEEKLY REPORT

Issue W20/2026 · 15 May 2026

Anthropic dethrones OpenAI in enterprise

Ramp Index shows Anthropic now leads in AI adoption among businesses.

CHART OF THE WEEK

AI Topic Relevance: LLM and Agents Lead (W20 2026)

This week, LLM and agentic AI topics dominate the news cycle, while enterprise and funding remain secondary but notable.

02 · EXECUTIVE SUMMARY

Three signals of structural shift this week

3 KEY TAKEAWAYS

- 01 Anthropic dethrones OpenAI in enterprise**
Ramp Index shows Anthropic now leads in AI adoption among businesses.
- 02 Token superposition cuts pre-training time**
New method speeds up LLM training by 2.5x, lowering costs across model sizes.
- 03 Agent orchestration shifts to workflows**
GraphBit's DAG framework eliminates loops, making agents reliable and auditable.

WEEK IN CONTEXT

This week was defined by a seismic shift in enterprise AI leadership as Anthropic surpassed OpenAI in corporate adoption, per the Ramp Index, signaling that safety and reliability now outweigh brand recognition. Nous Research released Token Superposition Training, accelerating LLM pre-training by up to 2.5x across 270M to 10B parameter models, slashing development costs. Converge Bio raised \$25M from Bessemer and tech executives to advance AI-driven drug discovery. Meanwhile, GraphBit introduced a graph-based agentic framework using deterministic DAG orchestration to eliminate infinite loops and hallucinated routing. Apple is reportedly loosening App Store rules for AI agents, opening new distribution channels. For businesses in 2026, the strategic imperative is clear: prioritize safe, reliable AI partners and invest in workflow-engineered agent architectures to stay competitive.

STAT OF THE WEEK

2.5x

Pre-training acceleration hits new heights

Nous Research's Token Superposition Training speeds up LLM development by 250%, making large models cheaper and faster to build.

\$25M

top deal — Converge Bio

03 · TOP STORIES OF THE WEEK

What moved the market — and what to do about it

#ENTERPRISE

OpenAI just lost its enterprise AI crown to Anthropic

FACT

Anthropic surpassed OpenAI in enterprise AI adoption, per the Ramp Index, signaling a leadership shift.

IMPLICATION

Enterprises prioritize safety and reliability over brand recognition, reshaping the AI market.

RECOMMENDATION

Audit your AI vendor mix and pilot Anthropic's models, especially if safety is a key criteria.

#LLM

Nous Research Releases Token Superposition Training to Speed Up LLM Pre-Training by Up to 2.5x Across 270M to

FACT

Nous Research released Token Superposition Training, accelerating LLM pre-training by up to 2.5x across 270M–10B parameter models.

IMPLICATION

This method slashes pre-training time by over half, making large-model development faster and cheaper for the entire industry.

RECOMMENDATION

Pilot Token Superposition Training on your next model run to cut compute costs by up to 60%.

#FUNDING

Converge Bio raises \$25M, backed by Bessemer and execs from Meta, OpenAI, Wiz

FACT

Converge Bio raised \$25M in Series A led by Bessemer, with backing from executives at Meta, OpenAI, and Wiz for AI drug discovery.

IMPLICATION

AI-native biotech startups are attracting top tech talent and venture dollars, forcing traditional pharma to accelerate AI adoption.

RECOMMENDATION

Benchmark your AI drug discovery capabilities against Converge Bio's platform within six months.

#LLM

GraphBit: A Graph-based Agentic Framework for Non-Linear Agent Orchestration

FACT

GraphBit, a new agentic framework, uses deterministic DAG orchestration via a Rust engine to eliminate hallucinated routing and infinite loops.

IMPLICATION

Declarative DAG orchestration makes agent workflows reproducible and auditable, shifting enterprise agent design from prompt engineering to workflow.

RECOMMENDATION

Pilot GraphBit for mission-critical multi-step LLM workflows where reproducibility and deterministic execution are required.

#LLM

Top 10 LLM Research Papers of 2026

FACT

LLM research in 2026 prioritizes safety, controllability, and agent capabilities over scale.

IMPLICATION

Enterprises must now evaluate LLMs for persuasion risk and tool-calling reliability, not just raw performance.

RECOMMENDATION

Audit your LLM stack for safety gaps and pilot agent frameworks supporting temporal reasoning.

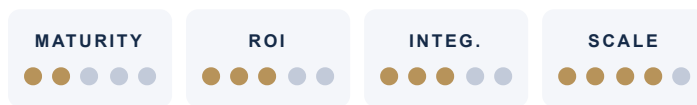

04 · TOOL · CAPITAL · OUTLOOK

What to watch, fund, and pilot next

AI TOOL OF THE WEEK

GraphBit

GraphBit is a graph-based agentic framework using a deterministic DAG orchestration engine in Rust.

GraphBit is a graph-based agentic framework using a deterministic DAG orchestration engine in Rust. It eliminates hallucinated routing and infinite loops, offering reliable non-linear agent coordination for complex enterprise workflows.

FUNDING & M&A — TOP

| COMPANY | STAGE | \$ | SECTOR |
|---------------------|----------|---------------|---------------|
| Converge Bio | Series A | \$25M | AI Drug Disc. |
| Anthropic | Series E | \$3.5B | AI Foundation |
| Anduril | Series F | \$1.5B | Defense AI |

Investment flows into AI infrastructure efficiency and vertical biotech AI, while enterprise preference for reliable vendors like Anthropic reshapes market. Expect continued funding for auditable, domain-specific AI-native startups.

LOOKING AHEAD · 2-4 WEEKS

- Anthropic's enterprise dominance will widen**
 OpenAI's mobile Codex launch may not reverse enterprise defections as safety concerns persist.
- Token superposition cuts pre-training costs by 2.5x**
 Expect accelerated release of smaller, faster models from Nous Research and others within weeks.
- Banks must overhaul data infrastructure for agentic AI**
 Expect major financial institutions to announce data modernization initiatives in the coming month.
